📄 PROFESSIONAL SUMMARY

Full Stack Developer with 8+ years of experience in building scalable, user-centric web applications with strong front-end and back-end expertise. Skilled in collaborating across teams to deliver high-quality, maintainable solutions within the deadlines. Expertise in multiple phases of software development lifecycle, from requirement gathering to development, testing and deployment.

📁 PROFESSIONAL EXPERIENCE

Software Developer Research Information System, Leibniz Institute of Ecological Urban and Regional Development (IOER)  09/2024 – Present | Dresden

- Eliminated ~40% of manual processing overhead across 8+ administrative and research workflows by leading end-to-end digitization of reporting and evaluation processes for 3 departments
- Slashed page load times by ~25% on research management tools (Laravel, Angular, React, MySQL) by implementing query optimization and strategic asset caching
- Connected 5+ external partner systems with zero integration failures by designing and owning 10+ RESTful APIs with versioned endpoints and structured error handling
- Improved document retrieval speed and audit traceability for 1,000+ research records by architecting a structured DMS with versioning and lifecycle management
- Raised test coverage to >80% and reduced recurring defects by enforcing OOP, clean code, and modular architecture patterns across the full stack
- Maintained 99%+ production uptime on GDPR-compliant systems through load profiling, automated test suites, and same-day incident resolution
- Shortened planning and reporting cycles for 10+ stakeholders (researchers, admins, IT leads) by replacing email-and-spreadsheet workflows with purpose-built Laravel/React web tools

Full Stack Web Developer, LIWETEC GmbH  08/2023 – 07/2024 | Bobingen

- Scaled an Elevator Portal to 10+ countries and 500+ concurrent peak sessions by building and maintaining full-stack features in Laravel, Symfony (PHP 8), Angular/React, and MySQL
- Reduced release cycle time by 30% by re-architecting a monolith into an event-driven microservice system of 6+ independent services, improving fault isolation and team velocity
- Trimmed inter-service latency by ~20% by designing 15+ RESTful APIs with optimized routing, payload compression, and structured versioning for distributed service communication
- Decreased bug regression rate by ~35% by applying OOP, Doctrine ORM, dependency injection, and event-based architecture patterns consistently across services
- Drove test coverage above 75% and established peer review standards adopted across the team, reducing post-release defects in every sprint
- Slashed deployment time from 2 hours to under 20 minutes by contributing to Docker containerization and CI/CD pipeline automation
- Shipped GDPR-compliant dashboards and planning tools for international clients across 10+ countries in agile Scrum/Kanban sprints with zero compliance incidents

Intern/Work Student – Full Stack Developer, Bosch Rexroth AG  05/2022 – 06/2023 | Ulm

- Built and launched 3 enterprise applications (SPM, APS, Prototype Tool) used daily by global engineering teams across 5+ countries, supporting 150+ active projects and 200+ datasets
- Reduced manual data entry by ~50% by designing RESTful APIs that integrated 6+ internal systems, automating previously manual cross-platform data flows
- Drove down release errors by ~40% by contributing to CI/CD pipelines and Azure DevOps repository management in Azure-integrated deployment environments
- Secured 500+ internal users with zero reported auth-related breaches by implementing authentication, authorization, RBAC, and 2FA across all 3 applications
- Improved average API response time by ~30% through systematic debugging, query optimization, and profiling of full-stack bottlenecks (Angular, Laravel, MySQL)
- Delivered all sprint milestones on schedule across 3 consecutive Scrum cycles, with zero blockers escalated to senior engineers

- Associate Software Engineer, Yanolja Cloud Solution

09/2016 – 03/2021 | India

 - Connected a global travel platform to 5 major OTA partners (Booking.com, Expedia, Airbnb, Agoda, Traveloka) by integrating 20+ third-party APIs (SOAP, XML, JSON), directly driving international booking revenue
 - Handled 10,000+ daily booking transactions with zero data-loss incidents by developing and continuously profiling RESTful APIs across 5 OTA platform integrations
 - Boosted system performance by ~30% by overhauling MySQL queries, adding indexes, and introducing caching – slashing average query time from 800ms to under 200ms
 - Sustained 99.5% uptime across peak travel seasons by resolving 100+ production incidents within SLA, directly protecting revenue-critical booking flows
 - Reduced new-feature delivery time by ~25% by refactoring 3 legacy modules using MVC architecture, cutting complexity and accelerating future development cycles
- Intern - Unity Game Developer, TechLeaper Systems Pvt. Ltd

01/2016 – 06/2016 | India

 - Shipped mobile game 'Nuts Run' to the App Store by developing and optimising gameplay systems in Unity3D and C# across a 6-month internship

EDUCATION

- M.Sc. in Automotive Software Engineering,
Technische Universität Chemnitz

04/2021 – 03/2023
- Master of Computer Applications (MCA),
Savitribai Phule Pune University

06/2014 – 04/2016

 - Grade: Outstanding
- Bachelor of Computer Applications (BCA),
Saurashtra University

06/2010 – 04/2013

 - Grade: First Class with distinction

TECHNICAL SKILLS

- Frontend: JavaScript, TypeScript, Angular, React.js, Next.js, Redux, Tailwind CSS, SCSS, Material UI
- Backend: PHP (Laravel, Symfony, CodeIgniter), Node.js, Python
- Databases: MySQL, PostgreSQL, MongoDB
- APIs & Integration: REST APIs, SOAP, JSON, XML, Swagger/OpenAPI
- DevOps & Tools: Azure, Docker, AWS S3, CI/CD, Keycloak, Postman, Cursor, Copilot, Git, GitLab, Bitbucket, Jira, Confluence
- AI Dev Tools: GitHub Copilot, Cursor
- Game Development: Unity3D, C#

LANGUAGES

- English: Fluent (C1) • German: Elementary proficiency (B1, actively improving)
