Professional Summary

Full Stack Software Developer with 8+ years of experience in designing, developing, and maintaining scalable web applications. Strong expertise in Laravel (PHP MVC), Angular, React, and MySQL, with a focus on high-performance, secure, and data-driven systems. Experienced in building Research Information Systems, enterprise platforms, and API-driven architectures. Proven ability to deliver robust solutions in agile and cross-functional environments, with a strong emphasis on quality, performance, and GDPR compliance.

Professional Experience

09/2024 – Present

Software Developer Research Information System | Leibniz Institute of Ecological Urban and Regional Development (IOER), Dresden

- Designed and developed Research Information Systems (RIS) to support research management, evaluation, and reporting processes.
- Planned and implemented digitization projects for administrative and research workflows, improving operational efficiency.
- Built and maintained database-driven web applications using Laravel (PHP MVC framework), MySQL, and modern frontend frameworks such as Angular and React, ensuring scalable and responsive user interfaces.
- Built and enhanced document management systems (DMS) for structured storage and retrieval of institutional data.
- Collaborated cross-functionally with researchers, administration, and IT teams to deliver scalable and user-centric solutions.
- Improved controlling and planning tools, enabling better data-driven decision-making and reporting accuracy.
- Performed software maintenance, monitoring, and optimization of internal web applications.
- Ensured software quality assurance, including testing, debugging, and documentation of developed systems.
- Created technical documentation, user guides, and training materials to support internal users and stakeholders.
- Ensured compliance with data protection regulations (GDPR) while handling sensitive research and administrative data.
- Contributed to agile project environments, working on both small-scale and large institutional projects.

08/2023 – 07/2024

Full Stack Web Developer | LIWETEC GmbH, Bobingen

- Developed and maintained the Elevator Portal, a globally accessible platform used by elevator companies of various sizes
- Built database-driven web applications using Laravel (PHP MVC), MySQL, Angular/React, HTML, and CSS
- Implemented engineering calculation modules for elevator component design in compliance with industry standards
- Developed tools for system planning, configuration, and component calculations, improving operational efficiency
- Created analytical dashboards and reports to support data-driven decision-making

- Optimized system performance and ensured scalability, reliability, and real-time updates
- Provided technical support and maintenance, ensuring high availability and seamless user experience
- Documented workflows and system processes to enhance knowledge sharing and team productivity

05/2022 – 06/2023

Intern/Work Student - Full Stack Developer | Bosch Rexroth AG, Ulm

- Developed scalable web applications including Smart Project Management (SPM), Component Prototype Tool, and Application Product Selector (APS)
- Designed secure, scalable architectures and responsive UI aligned with business requirements
- Built and tested RESTful APIs (Postman) supporting 150+ global projects and 200+ partner datasets
- Implemented authentication, authorization, and role-based access control for global users
- Developed features such as two-factor authentication, project tracking systems, and validation mechanisms
- Improved application performance through bug fixing, testing, and optimization
- Applied Agile methodologies to deliver projects efficiently and collaborate across teams

09/2016 – 03/2021

Associate Software Engineer | Yanolja Cloud Solution, (formerly eZee), India

- Integrated and managed third-party APIs (SOAP, XML, JSON) for global travel platforms
- Worked with major partners including Booking.com, Expedia, Airbnb, Agoda, and Traveloka
- Developed and optimized RESTful APIs to enable seamless communication between systems
- Reduced application load times by 30% through query optimization
- Resolved bugs and defects within tight SLAs, improving overall system stability and reliability
- Implemented MVC architecture to enhance application scalability and maintainability
- Collaborated with QA teams to reduce post-deployment issues through rigorous testing
- Delivered technical support for high-priority issues, improving partner satisfaction and system uptime

01/2016 – 06/2016

Intern- Unity Game Developer | TechLeaper Systems Pvt. Ltd, India

- Developed gameplay mechanics, UI components, and core game systems for mobile and PC games using Unity3D and C#
- Collaborated with designers and artists to integrate game assets, animations, and visual effects
- Optimized performance and memory usage to ensure smooth gameplay across multiple devices and platforms
- Contributed to the successful launch of the mobile game “Nuts Run”, utilizing Unity, C#, and JavaScript

Educational Details

04/2021 – 03/2023

Master of Science in Automotive Software Engineering (ASE)

Technische Universität Chemnitz, Saxony, Germany

Main Courses: Software Service Engineering, Database and Web Technique, Network Security, Machine Learning, Media Encoding, Research internship in web developer & designer

06/2014 – 04/2016	Master of Computer Applications (MCA) (Grade: Outstanding) Savitribai Phule Pune University, Pune, India Main Courses: Web Technologies, Cyber law and Information Security, Advance Java, Object Oriented Software Engineering, Advance Web Programing, Data Structure using C, (OOP)C++
06/2010 – 04/2013	Bachelor of Computer Applications (BCA) (Grade: First Class with distinction) Saurashtra University, Rajkot, India Main Courses: Web designing, object-oriented programming, relational database management system (RDBMS), Unix & Shell programming, E-commerce, and cyber security

Technical skills

Web Technologies	: HTML/HTML5, CSS/SCSS, JavaScript, TypeScript, jQuery, Bootstrap, JSON, XML, SOAP, AJAX
Programming	: PHP (Core, CodeIgniter, Laravel, Symfony, Smarty, WordPress), Node, Python
Frameworks	: Angular, React, Vue.js, Next.js
Databases	: MySQL/SQL, MongoDB, PostgreSQL, Amazon S3 Server
Web Services & Cloud	: Rest APIs and APIs testing (Postman & Swagger), LAMP, Microsoft Azure
Version Control & other	: GIT, GitHub, GitLab, Bitbucket, Azure DevOps, CI/CD, Jira - Scrum, Docker, Confluence
Operating System	: Window, Linux
IDEs	: Visual Studio Code, PHPStorm, Komodo

Social Skills

- Team leadership and project management
- Ability to work independently and adapt quickly
- Problem-solving mindset
- Strong communication skills and ability to work well with others

Extra-curricular Activities & Achievements

- Recognized multiple times for high performance and dedication
- Active participant in internal coding competitions and technical initiatives

Languages

English (Fluent)	German (A2, actively improving)	Gujarati (native)	Hindi (Fluent)
